Houses of worship spend millions of dollars each year due to lightning and surge damage to their electronic systems. Downtime, failure, and glitches in any of these electronic systems can cause financial loss for the organization. Transient Protection Design offers power and data surge protection products to protect and maintain peak performance of all church electronics including church lighting systems, organs, mixing consoles, amplifiers, video projectors, elevators, phone systems, security systems, kitchen appliances, and computers. TPD will also protect the heating and air conditioning systems.

Reduce Downtime
Reduce Maintenance Costs
Extend Equipment Life
Quick Payback
Huge Life Cycle Savings

UL 1449 Type 1 SPD
ETF Technology (Enhanced Transient Filter)
UL 1283 EMI/RFI Listed Filter
Install on any size breaker or direct to bus
200 KAIC rated fusing
No over-current protection required
Manufactured by Total Protection Solutions
25 Year Warranty Including Lightning

SAVE MONEY!!
Eliminate Damage
Reduce Lockups & Glitches

Improve the power quality at the breaker panel for your sophisticated electronic loads. Rebooting, reprogramming and replacing processors, circuit boards and components can be a never-ending battle. Problems in the system are as simple as occasional glitches locking up or turning on and off equipment without user input to widespread damage during a severe lightning storm. Microprocessors read information through current pulses as binary code (0s and 1s). As different pieces of equipment, appliances and components turn on and off, voltage and current pulses, known as transients, are generated. These pulses of energy can negatively affect every piece of equipment in the system. The problems will vary depending upon the size and frequency of these pulses. As microprocessors try to function, these transient pulses of energy will cause lock-ups where data can become lost or corrupted. Larger pulses will cause catastrophic failure while smaller pulses degrade the life and reliability of these systems and controls.

Breaker Panels
Sub Panels
Service Entrance

• Less Noise       • Longer Life     • Better Sound
• Less Lockups     • Clearer Images   • Less Glitches
• Eliminate Lightning Damage

Designed for electrical panels feeding:

- Sound System
- Projectors
- Stage Lighting
- Lighting Systems
- Organs
- Lighting
- Heating/Cooling

- Easy Install
- Retrofit or New Construction
- Improve the Bottom Line

- Reduce Electrical Maintenance Budgets
- Extend Life of All Equipment, Including Bulbs & Ballasts
- Prevent Catastrophic Losses Due to Lightning Strikes
